

RISK ASSESSMENT

Critical Solutions Group provides a thorough review and analysis outlining a number of scenarios that could interrupt your business. A detailed outline of all possible effects on your operations is drafted, based on our findings.

BUSINESS IMPACT ANALYSIS

A complete inventory and analysis of your organization's business functions is performed; it assesses the potential impact in the event of a loss of business continuity.

BUSINESS CONTINUITY STRATEGIES & IMPLEMENTATION PLANNING

We formulate a "road map" for recovering business processes (including technology and staff functions), which includes a detailed sequence of the implementation process.

CONTINUITY PLAN DEVELOPMENT & TESTING

Our consultants develop and document the business continuity plan that best suits your organization's requirements. This includes the identification of all test participants, test execution management, post-test review and follow up.

DATA CENTER CONSULTING

Critical Solutions Group's Data Center Consulting practice covers every phase of your data center through its lifecycle, including initiating, planning, executing, controlling, completing, and operating projects within your data center. Our thorough industry knowledge will help you increase efficiency as well as reducing capital expenditures within your data center's day-to-day operations.

The effectiveness of our data center consulting helps you assess, analyze and deploy solutions that are extremely focused and within your budget. Intimate knowledge of management, integration, scope, time, cost, quality, human resources, communications, risk, and procurement are elements that are required for successful data center consulting.

Our experience in every aspect of data center and IT project management makes us an indispensable partner for any of your data center operations. Our team will meet with you to discuss your company's plans and goals for developing and implementing your project, and deliver a detailed plan and timeline tailored to fit your budget, as well as all of your proprietary requirements.
